

For all E's enter 100 faults with the SCT in time. For no shows enter 1000 faults with the SCT in time.
For all clear rounds enter 0 in the faults column. Enter all faults whether time or course faults into the faults column.
Example: If the SCT is 40 seconds, and the dog runs the course in 41.5 seconds, 1.50 should be entered into the faults column.
<i>Enter faults and time for both rounds - formulas will automatically calculate "totals" for the individual classes and the combined result</i>
<i>To Sort overall, highlight all rows from row 8 down. Click custom sort. Make sure "My data has headers" is ticked.</i>
<i>Sort by Height & Overall total. (smallest to largest).</i>
